RE: Branchburg Township, New Jersey

Dear Jon:

When we hired Penn Valley to construct the addition of the Krupp Plastics project, we had every confidence that you would do the same good job on the addition that you did on the original building. You didn't disappoint us. In fact, when our customer pressed us with an earlier than planned upon completion date, your guys found a way to step up the schedule without sacrificing quality or adding cost.

Special praise should go to your personnel involved in the project - John DenBleyker, the project manager, showed the same steadfast professionalism on this project that he exhibited on the original building. It was for that reason that both Krupp and our company wanted John and Penn Valley back for the Krupp addition. We knew he would deliver.

Your new field superintendent, Jeff Bertoldo, also did a great job. You should be particularly proud of Jeff. He kept the jobsite spotless at all times and kept the work flowing without missing a beat. When we were all pressed to shorten the schedule, Jeff and John both took a "can do" attitude by placing the customer's needs first.

We look forward to our next project with you and your team. Thanks for a great job.

Sincerely,
S/K STONEY BROOK ASSOCIATES
