

# *Penn Valley Constructors, Inc.*

Daw's requirements included retrofitting a 21,000 SF building to provide a new office lab, manufacturing and warehouse

Existing floors were demolished and rebuilt to provide spill containment and sprinkler drainage collection (above)

Support for ink production includes:

- 600 gal. AFFF fire suppression system (above)
- Explosion prevention system per NFPA 69 with make-up air and exhaust system using energy recovery system (left)
- Solvent concentration detection system tied to the ventilation system (left)
- Emergency electrical generating system
